**Full Stack Developer** with 7+ years of experience developing scalable Web & Mobile applications using Angular, React, React-native, Redux, Node.js, Java, and Spring Boot. Skilled in Agile methodologies, Git, AWS & Azure, with expertise in micro-frontend architecture, dynamic forms, state management using NgRx/Redux and microservices. Recognized for technical excellence, customer satisfaction, and team mentorship.

## Skills

- Languages: **JavaScript, NodeJS, TypeScript, HTML and Java.**
- Frameworks: **Angular, ReactJS and SpringBoot**
- Mobile Frameworks: **React-native, Ionic.**
- Other Software Tools: **JIRA, Putty, Eclipse, VSCode.**
- State Management: **Redux & NgRx.**
- Version Controlling Tools: **Git**
- Cloud: **AWS and Azure**

## Experience

### Tech Lead

**Larsen & Toubro Technology Services, India**

**April 2022 - April 2024**

- Migrated the angular 8 application to latest angular 14 updated version and replaced libraries to angular material. Followed Mico Front End Architector and deployed in Azure cloud using pipelines.
- Created Dynamic forms which will be generated based on backend response
- Managing application data using NgRx store utilizing action, reducers and Ajax calls using Effects and Rxjs Operators.
- Experience in working with Custom Directives, Controllers, Services, and filter modules in Angular.
- Created Restful API's and integrated with front end application
- To improve the performance of the application, optimize the code and adhere to the DRY (Don't Repeat Yourself) principle.

### Senior Software Engineer

**Broadridge Financial Solutions, India**

**March 2019 - April 2022**

- Worked in Aspire Investor Broken Project By developing Web Applications for Clients BetaCapital, Stockcross, Safra, Quest, Cetera etc.
- Designed and developed responsive layouts, ensuring a consistent user experience across desktop and mobile platforms, tailored for admin, investor, and broker access.
- Enhancement in desktop and mobile context environments for various clients with Admin, Investor and broker access.
- Mentored junior developers by guiding them through best coding practices, reviewing their work, and providing constructive feedback to help them grow in their roles.

### Associate - Subject Matter Expert (SME)

**Amazon Development Center, India**

**Oct 2015- Sept 2018**

- Handle escalated or high-priority customer cases that require advanced knowledge and problem-solving skills.
- Conducting training session for a team and mentor team members to enhance their understanding of company policies, systems, and customer service procedures.
- Assist customers with placing orders, processing payments, and handling returns or exchanges efficiently and accurately.
- Investigate and resolve customer complaints, issues, or disputes in a timely and satisfactory manner, demonstrating empathy and understanding throughout the process.

## Personal Project

Developed Full Stack Application Social Media using React, NodeJS, Mysql and JWT Authentication and OTP validation. [\[Checkout Project\]](#)

## Education

### Master of Business Administration (MBA)

International Business University - Toronto, Ontario - M5S 2V1

### Master of Technology in Computer Science and Engineering (M.tech)

Jawaharlal Nehru Technological University - Medak, India - 500101
